Leadership Training Program is one such endeavor that aims to inculcate in the associates of the company leadership skills. A leader is the one who can keep his team united, has foresight and can make strategic plans for his and his team's success. A leader possesses a dynamic personality and positive attitude that will help him sail through the turbulent times. Keeping these traits in mind, a Leadership Training was organised for the associates of the company.

Learn to manage stress, before it makes your **Life** Unmanageable

When you put a frog in a pan full of water, he swims heartily and fearlessly, devoid of any pressure. Now you ignite the flames and let the temperature rise slowly. As the temperature increases, the frog is aloof as he is busy floating in the water, but when the water starts boiling, he cannot bear the heat and collapses. His lifeless body drowns in the boiling water of the pan. Stress has the same effect on us. When we persistently work hard for results, when failures and rejections bog us down, when pressure surrounds us from everywhere, even we human either fail or quit.

Most of the people are stressed to earn a better living and rest are stressed to climb the ladder of success to reach to the top. In both situations, stress is an inevitable part of life. But, is it helping us get what deserve or is making our life cumbersome? Stress not only wreaks havoc on our nervous system or despairs our cognitive skills, in fact, it also adversely affects our body, relations with family and our social circle. So, before it engulfs you and alters your personality, take charge by following these simple steps:

 **Dr. Ashok Bhatia**
Founder & Chairman I.M.C

Learn from failures: Resilience is a quality that can turn around every situation. When rejection or an unsuccessful venture makes you feel under confident and doubtful; don't quit at that time. Rather bounce back and try again. Don't be afraid of rejection or failure, it is part of the learning process rather learn from your mistakes and bounce back.

Be positive: Optimism is like the sun that can evaporate the clouds of negativity and failure. Negative thought or approach towards work will only breed more negativity leading to a suffocating work environment and reduced productivity. It is often observed that when associates talk to people about network marketing and face rejection, he also becomes negative and leaves the system. On the contrary, when people discuss negative experiences, you should share positive experiences and success stories. This will not only keep you stay positive but will change other's mentality as well.

Make a to-do list: What do you want to achieve this month? What is your business strategy? It is said half of the work is accomplished if properly planned. It will relieve you from stress and give time to execute. One of the major reasons for stress is improper planning; it leads to delayed execution and results, thus failure of the project. So, every month make a list of things to do to achieve your goal.

Balance work and workout: Research suggests that the best way to manage stress is through physical exercise. Regular exercise releases happy hormones which result in reducing stress, negativity and mood swings. Take out time from your busy schedule for your body and go for a brisk walk, yoga session or hit the gym. It will not only keep you active but will also relax your mind.

Physical and Mental Relaxation: Our mind needs to relax in order to produce results, so does our body. Sleep for at least 7-8 hours at night and most important, sleep early. Remember the idiom, "Early to bed early to rise, makes the man healthy, wealthy and wise". Give your mind and body a break from work to relax and unwind.

Remember, the underlying cause of 80% of health problems is stress. When stress gets accumulated in our body, it takes the form of physical illness and disrupts our system. So, if you want to live a long and healthy life, if you want to make your dreams come true and if you want to be a role model for others, then first learn stress management.

"It's Quality, not the quantity of life that matters."

The Formula for **SUCCESS**

Dream, Act and Achieve

In this world, people can be divided into two groups: The Dreamers and The Creators. Dreamers are the ones with great visual skills and imagination. They imagine every luxury is in their reach, they are on top of the world and life is a vacation. But mind it; this is only in their dreams. It is said that ***“Daydreaming is like a mirage, you get tempted by something that isn’t real.”*** Daydreamers do not get anything, even though their imagination is impeccable, you know why? It is because they are procrastinators, and when the time is gone they regret and curse destiny for their shattered dreams.

The second group of people is, ‘The Creator’. These are the set of people who are visionaries. They have a dream and they also move on to the second step which is “Action”. When a dream is fueled with a plan of action, it has the potential to come true. The creators neither daydream nor procrastinate rather they set up a goal and conceive a strategy to achieve that goal in the set time frame. So, if you want to lead a successful life, choose to be a creator not a daydreamer. After defining the two groups of people, you may wonder what should be done next. What are the steps that guarantee success? How can you make your dreams come true? Many people come to me and ask what my success formula is. Success is nothing but persistent efforts towards your goals. Every step you take on the journey to success is a learning curve, not a speed breaker. So let’s breakdown the formula of success:

Mr. Satyan Bhatia
Managing Director I.M.C

Dream it: Dreams are important; in fact, they are fuel to your brain. Only a man who dreams will put efforts to make them come true. A man who has no dreams is just surviving through life without any goal or mission in life. So dreams are constructive, they build your cognitive skills, your personality, and your life. But, as I said, it is just the first ingredient of the formula of success. We can only achieve what we can conceive, that is why humans are called creators. So, remember, our mind is the first place where our dreams get a life and then when we work towards it, it becomes our physical reality.

Act upon it: Dreams won't come true if you won't put efforts. Action is the must that is why humans are called builders. When our mind creates something, it requires effort to make it your reality. So, if you have a dream to start your own business, then start meeting people, network with them and help them fulfill their dreams; it will directly help you to establish your business. Often, while we are working hard in the right direction, we face failures and rejection. Don't feel dejected and lose hope, on the contrary, remember it's just a learning curve. My success mantra is, "You never fail on the road to success, your just figure out 99 different ways of not getting the result and 1 right way of getting the result." This approach keeps me going.

Achieve it: When you put consistent efforts in the right direction when you are focused on your journey and undeterred by failures; what do you achieve? You achieve your goal. A dream that was once incepted in your mind has now become part of your life. You are living it, sharing it and inspiring others with your success stories. That's how legends are made.

Friends, we often think that whatever happens happens by God's will. We attribute our failures and regrets to destiny. But, what is destiny? Isn't it a choice we make every moment? Isn't it one right decision and one small step towards your dream? Yes, destiny is what your mind can create and your hands can build. So, wake up and start doing something to make your dreams come true because you are the creator of your destiny.

Leadership Training Program:

Where Leaders Build Leaders

Today's world is smart and progressive and comes with its own share of obstacles. From simple living and working hard in the fields to working smart to achieve fame in this competitive world, life has changed drastically. But, one thing that remains constant is that we still thrive on soft skills. According to a study, in order to become successful, you should have 87% soft skills and 13% technical expertise. Leadership is one of the soft skills that will help you climb the ladder of success and retain it for a long time. IMC understands the importance of soft skills, so from time to time; we give opportunities to our associates by trianing them to become world-class leaders.

Leadership Training Program is one such endeavor that aims to inculcate in the associates of the company leadership skills. A leader is the one who can keep his team united, has foresight and can make strategic plans for his and his team's success.

A leader possesses a dynamic personality and positive attitude that will help him sail through the turbulent times. Keeping these traits in mind, we invited Mr. Sunil Jadhav, a leading corporate trainer, and motivational speaker. He is a world-renowned trainer who specializes in leadership training and shared his inputs on what makes a person a thought leader. The session began with the commemorating ceremony followed by a

session on Dreams and Vision by Crown President Ajay Maan. His words of wisdom and success story made the people believe that no matter your background if you have the zeal and patience, you can be your best version and live your life to the fullest.

During the session, leaders were also taught how to explain the business plan of the company to the newcomers. Our Kohinoor Star Achiever, Mr. Prem Kumar

took a session on the business plan and shared important changes in the plan. Associates were taught effective techniques to explain the business plan, its benefits and

how IMC can create your legacy. Often, people get bored while hearing the plan, so leaders were taught ways to make the plan interesting and how with the help of voice modulation and self-confidence, one can become a successful orator. IMC markets Ayurvedic products that can help in holistic healing, but it is important to understand the benefits of each product and learn how to use them. Dr. Anand Bajpai explained the benefits of IMC Products along with the live product demos.

After the session on IMC products, Crown President Sanjay Kumar Sahu took a session on the active offers of the company. Offers and deals are the best way to boost your business. With IMC offers you can explore the world and create memories. Mr. Sanjay Kumar Sahu explained the latest offers of the company and gave tips on qualifying the offers seamlessly.

Last but not least, the much-awaited session with MD of the company, Mr.

Satyan Bhatia was conducted. He gave an overview of the upcoming projects, discussed the problems of leaders, and spoke about conflict resolution to create an

amicable environment within the team so that the team stays united. Associates were high on enthusiasm and committed to the goal of becoming world-class leaders and torch-bearers of transformation.
